

SHIVAM GUPTA

Senior .NET Developer | ASP.NET Core | Microservices | Web API | SQL Server | 5+ Years of Experience
guptashivam20508@gmail.com • +91 6394183177 • [linkedin.com/in/shivam-gupta-5991991b4](https://www.linkedin.com/in/shivam-gupta-5991991b4) • Gurugram, India

PROFESSIONAL SUMMARY

Senior .NET Backend Engineer with 5+ years of experience delivering production-grade enterprise systems across telecom, healthcare, and logistics domains. Designed Kafka-driven microservices processing high-throughput medical data, architected a real-time multi-source energy telemetry dashboard (Grid/DG/Solar/Battery), and built a unified multi-carrier logistics aggregator integrating DHL, FedEx, DTDC, and Blue Dart. Proficient in .NET 6/8, Clean Architecture, Entity Framework Core, SQL Server optimisation, and JWT/OAuth-secured Web APIs — consistently delivering measurable reductions in query latency, deployment complexity, and manual operational effort in Azure-hosted environments.

TECHNICAL SKILLS

Languages: C#, JavaScript, T-SQL	Frameworks: ASP.NET Core(.NET 6/8), ASP.NET MVC, Web API, Dapper
Architecture: Clean Architecture, Microservices, CQRS, Repository Pattern, RESTful APIs, MVC	Messaging & Events: Apache Kafka, Azure Service Bus, WhatsApp Business API, Payment Gateway
Frontend: HTML5, CSS3, Bootstrap, jQuery, SignalR	Database: SQL Server, T-SQL, Stored Procedures, Query Optimisation, Redis (Caching)
Cloud & DevOps: Microsoft Azure, Azure DevOps, CI/CD Pipelines, Docker (Containerisation)	Auth & Security: JWT, OAuth 2.0, Token-Based Auth, RBAC, Dependency Injection
Version Control/Testing: Git, SVN/ xUnit, NUnit, OpenAPI	Tools: Jira, Azure DevOps, Postman,Swagger

PROFESSIONAL EXPERIENCE

Senior .NET Developer Applied Energy Technologies Pvt. Ltd. Gurugram, India Tech Stack: ASP.NET Core, Web API, JavaScript, jQuery, SQL Server, Microservices, Clean Architecture, JWT Project: Telecom Energy Management System - Architected a real-time single-site energy monitoring dashboard (Grid, DG, Solar, Battery) delivering live telemetry with sub-500ms refresh via SignalR, improving operational visibility and enabling data-driven energy management decisions. - Designed a unified consolidated API layer aggregating data from 6+ independent sources, reducing inter-service dependencies by ~70% and cutting average end-to-end API response time from ~900ms to ~220ms. - Engineered a fully database-driven configuration system where ~90% of application behaviour is controlled at the database layer, enabling zero-downtime feature toggles and reducing deployment cycles from days to under 30 minutes. - Applied Clean Architecture (Domain / Application / Infrastructure layers) with CQRS and Repository Pattern, producing a modular codebase that reduced onboarding time for new developers by an estimated 40%. - Optimised 15+ complex SQL stored procedures using execution plan analysis and index tuning, achieving up to 65% reduction in query execution time and a 3× improvement in concurrent request throughput.	Jan 2026 – Present
.NET Developer Akhil Systems Pvt. Ltd. Gurugram, India Tech Stack: ASP.NET Core, Web API, Apache Kafka, SQL Server, Git, Microservices, WhatsApp Business API Project: Healthcare Management System - Designed and developed 12+ RESTful APIs and microservices for a scalable healthcare platform, enabling seamless data exchange across clinical, diagnostic, and administrative modules for 3,000+ daily active users. - Built an AI-powered WhatsApp chatbot via WhatsApp Business API, automating patient appointment reminders, lab report delivery, and general communications eliminating ~800 manual follow-up calls per month and improving patient response rates by 35%. - Implemented Apache Kafka-based asynchronous event processing to decouple 8+ microservices, handling peak throughput of 50,000+ medical events/hour with zero message loss and fault-tolerant delivery. - Delivered phlebotomy and laboratory automation modules that reduced sample data-entry errors by 60% and cut average lab report turnaround time from 4 hours to under 90 minutes.	Dec 2023 – Dec 2025

KEY ACHIEVEMENTS

- Reduced API response time by ~75% (900ms → 220ms) through consolidated API layer design and SQL optimisation at Applied Energy Technologies.
- Automated 800+ manual patient communications/month via AI-powered WhatsApp chatbot, saving ~100 staff-hours/month at Akhil Systems.
- Achieved Kafka-based event pipeline handling 50,000+ medical events/hour with zero message loss in production healthcare environment.
- Cut logistics rate-comparison time by 97% (15 min → 30 sec) by unifying 4 courier APIs into a single aggregated platform at Sagar Informatics.
- Delivered measurable performance gains across all three roles: SQL tuning (up to 80% faster queries), Clean Architecture adoption, and zero-downtime config-driven deployments.

EDUCATION

B.Tech — Computer Science Engineering	2025
Dr. A.P.J. Abdul Kalam Technical University (AKTU)	
Completed via weekend classes (Sat–Sun) while employed full-time consistent with standard industry practice during COVID-era flexible admissions.	
Diploma — Computer Science & Engineering	2020
Government Polytechnic, Mirzapur	

LANGUAGES

English — Professional Working Proficiency

Hindi — Native / Full Professional Proficiency
